Project experience

Fitness and healthcare Website

jun 2022 - Aug 2023

I created and collaborated on a group fitness website, incorporating HTML, CSS, and JavaScript. This platform showcases fitness awareness videos and workout routines.

Grocery inventory website

Sep 2023- Feb 2024

I developed and contributed to a grocery inventory management system that incorporates React and database connectivity.

Carrer track-Academic performance dashboard

Mar 2024- Present

Developing a 4-year academic performance tracking dashboard with resume building for job placement using React JS powered by the Power BI tool. This project will incorporate machine learning for enhanced functionality.
